Air hockey multiplayer unblocked

Community Buy Now Download Take on the challenge and defeat all world champions in air hockey in this Air Hockey World Championship game. Choose your country and play against the other top teams in the world, beat them all and become world champion. The first player to accumulate seven points wins the game. You win a point by hitting the puck in the opponents' goal. The player who scores a point will have the puck's possession to the next serve. The puck can be hit with any part of the hammer. Play a fun, futuristic, space age version of online air hockey against the computer or a friend! Galactic Tennis is a challenging and quirky air hockey simulation game that requires quick reactions and good hand-eye coordination as you try to score goals by forcing the puck past your opponent's paddle (spaceship). Reasons to play this reactions-based skill game: This is a really good, online simulation game that comes quite close to replicating the actual skills and movement of real life air hockey! Exercise and test your concentration level, expectation skills, and fast reflexes. Enjoy playing with a crazy spaceship paddle in front of seemingly thousands of eager spectators. If you don't feel like grinding it out against the computer in single player mode, challenge a best friend, classmate or family member to an intense air hockey match-up! Strategy for winning: Quick reactions and agile keyboard control skills are really important here as you maneuver your paddle across the playground. Try to predict the direction of the puck as best you can and let your paddle in a smart central position as often as possible when the game gets very fast and intense! How to play: A fun, Flash-based, 1 & 2 player air hockey skill game for portable, portable and desktop PC/Mac (with certain browsers). Play against the computer or with a friend/family member (on the same computer) in a series of 'first to five' goal match-ups. When the game loads, click the 'Start' button in the lower left corner to get the main menu. Only one player and two player modes are available here (Training and speed modes are locked). In One Player Mode, you take on virtual opponents in first to 5 goal matches. In two player mode, you play against a friend on the same computer in a one-time match. The game has 4 difficulty levels: Beginner, Amateur, Expert and Master. The higher the difficulty level, the faster the puck and paddles move. In 1 Player Mode, you control the paddle closest to the bottom of the game screen using the arrow keys on your computer's keyboard. In 2 Player mode, Player 1 controls the bottom paddle with the arrow keys, while Player 2 controls the top paddle using WASD Keys. Keep an eye on the scoreboard on the left side of the game screen. Each time a player scores a goal (forces the puck past his opponent), one of the colored panels lights up. The first player to score 5 goals wins the match. If this Flash-based game no longer works IE11 or or browser on your PC/MAC, try playing Firefox browser with Adobe Flash player installed. Page 2 Collect rings with acrobatic, gravity-defying jump moves and avoid being squashed by giant bouncing balls in this high-octane, platform-based game of skill and survival (with a cool 2 player/teamwork option!). Blue is a fun and challenging 80s arcade-style, 8-bit pixel graphics game for kids, teens and nostalgic adults, where you have to jump around in a limited blue playground, scoop up rings and try to evade large and unpredictable bouncing balls. The best part is that help is at your fingertips if you need it – you can add a ring-collecting teammate at any time to make this a cool '2-player' collaboration effort! Reasons to play this entertaining, reactions-based arcade game: If you like classic movement and jumping games, this game should be a hit for you. Nostalgic fans of simplified 8-bit graphics from the 1980s should also feel at home with the basic controls and easy-to-do tasks at hand, where you train and test reaction speed, judgment and timing skills. Strategy for winning: Good hand-eye coordination, quick reactions, knowledgeable timing and keyboard control skills are key to progression as you try to dodge and weave around the irregular 'Bouncing Ball Baddies'. If you find yourself struggling to compete, don't be too proud to call in a best friend, classmate or family member to give you a helping hand. How to play: A Flash based, reactions and skill game for notebook, laptop and desktop PC/Mac (with certain browsers). The game must be automatically loaded on the main menu screen, where you have two different game modes to choose from: Ring Mode and Frenzy Mode. If you want to play on your own, go ahead and click on the mode of your choice (Only Ring Mode is available at first game). However, if you want to play with a friend, click the 'To/from Co-op' icon once in the upper right corner, and then select your game mode. In 'Ring Mode', you need to collect 10 rings in a row without getting hit by a Bouncing Ball Baddie. There are 36 increasingly challenging levels. Use the arrow keys on your computer's keyboard to control Player 1, and (if selected) the WASD keys to control Player 2. In later levels, press the up arrow/WV twice in a row to perform a double jump. You can also perform 'wall jumping' by holding down the key that directs your character toward the wall, and then pressing the jump button at the same time. Run through both sides of the game screen and your character will automatically appear on the opposite side. Call down randomly from the top of the playground. You can see how many rings you've collected at the bottom of the game screen. If one of your characters gets hit by a ball, this drops to back to zero. In 'Frenzy Mode', your goal is to survive as long as possible and collect as as possible in an increasingly ball-filled game area. Every Time You Assemble a Ring, a New Randomly Sized Bouncing Bouncing Baddie is added to the playground. You must complete a certain number of levels in ring mode to unlock different difficulty levels in Frenzy Mode. If this Flash-based game no longer works on IE11 or the Chrome browser on your PC/MAC, try playing Firefox browser with Adobe Flash player installed. It is classic Air Hockey against your computer opponent in 3 levels: Easy, Medium and Hard. The first to score 15 points wins! You can play this game on your computer and mobile devices. Devices.
